WHAT IS COMPUTERLAND?

A GOOD DEAL—AND A GOOD DEAL MORE

■ ComputerLand stores specialize in providing computer solutions to business problems, starting with choosing the computer system most appropriate to your business's particular needs. Computers are key tools for today's most successful businesses—and ComputerLand stores are staffed by friendly experts who are knowledgeable about those tools; how to use them; how to make the most of them; what to do if something goes wrong. We sell them, service them, install them, and teach your business how to use them.

ComputerLand is the world's largest retailer of personal computers—more than 800 stores in 24 nations. Since 1976, we've sold more personal computers to more people—and businesses large and small—than anyone else.

TRAINING

■ These days, training in hardware and software is essential. What good is a computer system if no one knows how to use it? ComputerLand stores offer a wide variety of computer courses. The focus is on taking full advantage of the productivity your new system provides. Whether it's a new users class or an advanced database programming class, you'll learn to use computers more effectively.

SERVICE

■ Computer systems are not simple. Most are so complex that even ordinary maintenance and repair require experts. That's why each ComputerLand store has a complete service department, staffed by manufacturer-authorized experts, to fix your computer equipment. ComputerLand stores offer a choice of service plans, from carry-in repairs to instant, on-site service.

SUPPORT

■ Using computers is an ongoing learning process. We want to know how you're doing; whether you have any questions or problems; what we can do to help. ComputerLand's staff is there to answer questions; help you solve problems; suggest how to make the most of your system. We offer software support, hardware support, and just plain human support—even a free top-quality magazine to keep you informed and interested in today's technology.

COMPUTER- LAND ACCESSORIES & SUPPLIES

■ If you're like most business people, you receive plenty of office supply catalogs that offer everything from fire extinguishers to steno pads. We don't. The ComputerLand Accessories & Supplies Catalog offers a special selection of products to enhance business computer systems. We feature our own line of ComputerLand accessories and supplies designed especially to ensure that you get top quality, and reasonable prices with a reliable company that stands behind its products. We believe the convenience of getting computer supplies and accessories from your computer dealer makes a lot of sense.

ACCESSORIES & SUPPLIES CATALOG

Prices in this catalog are the manufacturer's suggested retail prices at the time of printing. ComputerLand stores are independently owned, and prices may vary.

DATALIFE DISKETTES.

■ These rugged diskettes last nearly ten times longer than the industry standard specifies. And now DataLife's 5¼" high-density diskettes are preformatted for DOS 3.0 and higher.

And for the ultimate in convenience and protection, the DataLifePlus series offers preformatted diskettes for IBM PCs and compatibles (DOS 2.0 and higher). These diskettes are Teflon® coated, making them impervious to spilled coffee or sticky fingers. They also have an exclusive DataHold liner that disperses static electricity before it can damage your data.

DataLife's 3½" diskettes feature a data protecting "auto shutter" and an integral write/protect system, they have been verified independently as the best in the industry. All diskettes in this series are certified to be 100% error free, and come with a lifetime warranty. Ten per box.

MASTER DISKS.

■ Twenty years ago, IBM invented the diskette. Then they reinvented it several times over, improving quality and reliability along the way. Every part of every IBM diskette is rigorously tested to make sure you get the performance and dependability you need. Choose from 3½", 5¼", and 8" diskettes, all of which come with a 5-year limited warranty.

WE'VE PERFECTED THE FLOPPY DISKETTE.

■ At ComputerLand, we have a serious commitment to our customers. That's why we manufacture diskettes with quality that cannot be surpassed by any others in the industry. We use a high-precision coating technology that provides uniform performance to a tolerance of 0.1 microns. We rigorously test each diskette for magnetic retention, shape, and thickness. We do all of this and more to bring you a premium product you can trust. Lifetime guarantee. Boxes of ten.

3M TAKES THE WORRY OUT OF USING DISKETTES.

■ Your job is tough enough without having to worry about diskette performance. With the new 3M Mark Q 5 1/4" diskettes, you'll never have to. Created with an all-new manufacturing process—including a proprietary method of jacket assembly—these diskettes have been tested to 30 million passes with no media deterioration. That translates into 2,000 years worth of work! Both the 5 1/4" and the

equally durable 3 1/2" diskettes come with write-on labels and storage box labels, and the 5 1/4" diskettes also come with write-protect/write-enable tabs...everything you need to get organized quickly and then get on with your real work. Includes full lifetime warranty and toll-free user hotline. Boxes of ten.

THE ONE AND ONLY BERNOULLI BOX.®

■ When you want portable, convenient, expandable data storage, you can turn to the state-of-the-art Bernoulli Disk Cartridge by Iomega.® This rugged, compact flexible disk cartridge is nearly impervious to disk-head problems because the head never actually touches the disk. Its tough exterior resists contamination and shock, allowing transportation by hand or by mail. Use it in place of a hard disk, or as a backup to a hard disk. Available in 8"-10 megabyte, 8"-20 megabyte, and 5¼"-20 megabyte single cartridge packs.

■ ComputerLand is the world's largest retailer of personal computers, with more than 800 stores in 24 nations. Since 1976, we've sold more personal computers to more people than anyone else!

ComputerLand

3M— THE BEST IN BACKUPS.

■ You can't trust your important data to a hard disk alone. That's why it pays to use 3M data cartridges for backups, data protection, and peace of mind. 3M invented data cartridge technology in 1971, and since then they've continually improved the quality and reliability of their product. Today's 3M cartridges feature such improvements as textured drive belts, no-end play hubs, back coated tape, and one-piece guides. They're ideal for data storage or distribution, transaction logging or data acquisition—the entire range of memory management applications.

DATA CARTRIDGES YOU CAN COUNT ON.

■ Verbatim's DataLife data cartridges promise you the highest level of performance of any data cartridges on the market today. Each cartridge is certified to be 200% better than proposed ANSI dropout standards. The cartridges are

3M's DC 1000 Alphamat cartridge is formatted for compatibility with Data General, Irwin, Olivetti, and Zenith 20 Mb data cartridge drives. The DC 1000 Deltamat cartridge is compatible with Irwin and Olivetti 10 Mb drives. DC 2000 Gammamat is compatible with Apple, ADIC, Seagate, and Mirror technology 40 Mb data cartridge drives

and the DC 2000 Kappamat is compatible with Irwin and Olivetti 40 Mb drives. All 3M cartridges come with a 2-year warranty.

COMPUTER- LAND'S HANDY DISK FILE.

■ Store thirty 3½" or fifty 5¼" diskettes in these compact files from ComputerLand. These sturdy cases feature a plastic cover to protect your disks from dust and other harmful materials. The cover stores behind the case to give you more desktop space.

Three dividers snap into place to display disks at a convenient 20 degree angle. A built-in handle and pressure closure system keep the lid secure while you carry the file. The non-skid rubber feet prevent sliding and won't scratch your desk's surface.

TWO EXCELLENT WAYS TO STORE DATA CARTRIDGES.

■ If you've been keeping your data cartridges in a drawer, you know how difficult it can be to find the one you need in a hurry. SRW's got the solution: Data Cartridge Cube® for DC 300/600 tapes and Mini Data Cartridge Cube® for DC

1000/2000 tapes. Each Cube is a handy organizer that holds ten cartridges in their original protective cases; it is mounted on non-skid, non-marking rubber feet. You can stack the cubes to form a tape library with maximum storage and minimum size; select a cartridge and it tilts out for easy handling.

SW 1043	
Mini Data Cartridge Cube (DC 1000/2000)	\$9.95

Data Cartridge Cube (DC 300/600)	12.95

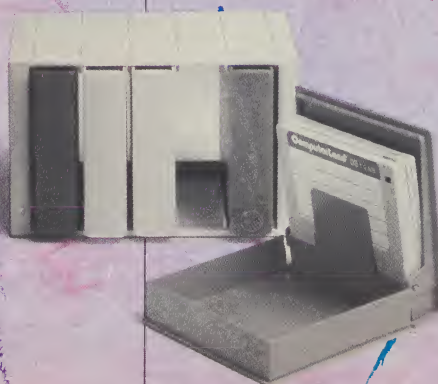

DID YOU KNOW...

that—we carry many products not listed in this catalog? We carry software, for example, and ComputerLand's own line of hardware, including an upgradable computer, monitors, hard-disk drives, and tape backups. Our products offer exceptional value. For more information about these products, ask your ComputerLand dealer.

BUILD A DISKETTE LIBRARY.

■ The Color Coder™ collection files consist of five separate color-coded disk cases. Each case holds up to ten 5¼" diskettes, for a total capacity of 50. Includes disk and spine labels. (5¼" cases do not include stacking cube.)

Then there's the Micro Disk Cube™. This ingenious file lets you store five separate color-coded disk cases in one neat cube. Cubes can be securely stacked, creating an expandable library. Each case holds up to five 3½" micro disks, for a total capacity of 25. Includes face and spine labels.

CAN THE MACINTOSH™ BE IMPROVED?

■ The Maccessories® Tilt/Swivel pedestal lets you adjust your Macintosh to the viewing angle most comfortable for you. You can tilt your Macintosh, Macintosh Plus, or

Macintosh SE as much as 20 degrees and swivel it 360 degrees to eliminate glare and relieve the backaches you get from looking down at your screen. To install, simply place your Macintosh's feet in the four holes provided.

KE 2004	
Maccessories Tilt/Swivel, platinum	\$29.95

your CPU vertically on the floor. The Universal System Stand holds IBM PCs, XT's, AT's, Compaq Deskpros, and hard disk drives—any CPUs measuring 4½" to 6½" in height.

KE 2029	
Universal System Stand	\$29.95

A SUPER SOLUTION TO SPACE PROBLEMS.

■ Clear more work space on your desktop with Kensington's Maccessories SuperBase™ (not shown). It positions your Macintosh a full 4" above your desk, providing enough shelf space for a second drive. This frees up room under the shelf for papers or manuals. The SuperBase lets you tilt and swivel your Macintosh for the most comfortable work angle. Fits the Macintosh, Macintosh Plus, and Macintosh SE.

KE 2024	
Maccessories SuperBase	\$49.95

SAVE SPACE WITH THIS STURDY CPU STAND.

■ Now you can free up valuable workspace by using this sturdy plastic stand to position

ComputerLand

MUFFLE YOUR PRINTER.

Printers should be seen and not heard. That's why Kensington developed the Printer Muffler—to reduce printer noise by 75 to 85 percent, while keeping noise in and dust out. The Printer Mufflers are constructed of durable, high-impact styrene and lined with sound-absorbing foam. Clear plastic covers let you easily observe what's going

on, and rear slots assure an easy paper flow. For maximum efficiency, also order the Printer Muffler Stand, which lets you save space by stacking paper underneath the printer and Muffler.

COMFORT- ABLE, GLARE-FREE VIEWING.

Mount your monitor on ComputerLand's 12" stand and, for the first time, you'll understand the meaning of viewing comfort. The stand

tilts 25 degrees and swivels a full 360 degrees, so you can avoid neck strain from looking down at the screen and eye strain from screen glare. Also available in a 14" version for larger monitors and portable computers.

CL 2010 Monitor Stand, 12"	\$29.95
CL 2011 Monitor Stand, 14"	34.95

SLIDE YOUR TROUBLES AWAY.

Too little space for your computer and keyboard? The Keyboard Slideaway slides to the rescue. When you're ready to use your computer, just

slide out the keyboard. When you're done, slide the keyboard right back into its sturdy frame. Accommodates any personal computer and any keyboard 8" deep or less and 3¼" high or less.

FOR YOUR LETTERHEAD.

■ These superior quality sheet feeders from NEC help you save time accomplishing any print job, large or small. The Sheet Feeder Plus automatically feeds your letterhead and/or second sheets into the printer and stacks them neatly as they come out. Envelopes and single sheets can be inserted manually. Use the Envelope Adapter to feed envelopes into your printer automatically and to stack them after they're printed. (Requires Sheet Feeder Plus.)

Also available: a sheet

feeder that can be operated by your software or manually. The dual bin adapter saves time when you're printing documents that require letterhead and second sheets. The Dual Bin Adapter feeds from two

hefty 200-sheet input bins. (Requires Sheet Feeder Plus.)

PRINTER ACCESSORIES

FREE UP YOUR SCREEN.

■ The Microfazer II gives your printer an additional 64K of memory of its own. If you still need more, the expansion board is upgradable to 512K. Adding memory chips to the board can give you as much as two megabytes of memory. The Microfazer II is flexible as

well as powerful. It comes with both serial and parallel connectors, so it can be used with just about any printer or plotter. For ease of use, the Microfazer II features built-in Pause, Reset, Error, Ready, and Copy features.

THE INTELLIGENT PRINTER INTERFACE.

■ Orange Micro's ProGrappler and Grappler C/MAC/GS let you use popular 9-pin printers with Apple computers. The Grappler C/MAC/GS is a "smart" cable that takes Apple ImageWriter II printing instructions and converts them to the instructions your

9-pin dot-matrix parallel printer understands. There are no drivers to install or new menus to set. Cables included for Macintosh/Plus, Macintosh SE, and Macintosh II.

The Grappler LQ emulates Apple's powerful new ImageWriter LQ printer. Use it with popular 24-pin printers like Toshiba and the Epson LQ series or with Hewlett-Packard compatible laser printers.

LONG DISTANCE PRINTER.

■ Now you can break the ten foot parallel interface barrier. Long-Link allows a printer to be placed up to 7000 feet from the computer. Inexpensive telephone wire transmits the data from the computer to the printer. Two year warranty.

COMPUTER- LAND'S SWITCH BOXES— UNSURPASSED QUALITY.

■ When it comes to switch boxes, ComputerLand offers you outstanding quality and value. These attractively styled units feature printed circuit board construction—with sealed rotary switches and fully shielded cases—that assures efficient and reliable transmission of your data.

The two-position switch box lets you connect two parallel peripherals to a single com-

puter port using three standard DB25 female parallel printer cables. A push-button lets you change configurations instantly. The three-position switch box lets you connect three peripherals to one computer, or three computers to

one peripheral, with an easy A-B-C switch setting. Both switch boxes come with 1-year warranties, and both are available as plug-in options for ComputerLand's Power Director®.

PROTECT YOUR EQUIPMENT FROM POWER SURGES.

■ Tripp Lite offers four ways to get superior, reliable surge protection for your computers. The Spike Bar spike and noise suppressor features six outlets, an on/off switch with 15-amp circuit breaker, and a six-foot cord.

Isobar® surge suppressors feature filter isolation. This unique design eliminates the

possibility of interference between different devices plugged into each Isobar. In addition, Isobar's "cascade design" spike and noise suppression circuitry allows you to choose the level of protection you need, supplying more protection for your most sensitive equipment like CPUs and disk drives or less for your more tolerant equipment like printers and monitors. Isobars are available in 2, 4, or 8-outlets. All units have an on/off switch, a 15-amp circuit breaker, and 6 foot cord (12-foot on 8-outlet model).

Telespike Block Modem Protector	\$59.95

STOP SURGES.

■ Surge problems will be a thing of the past with ComputerLand's own PowerLine Strip surge protector. Press the il-

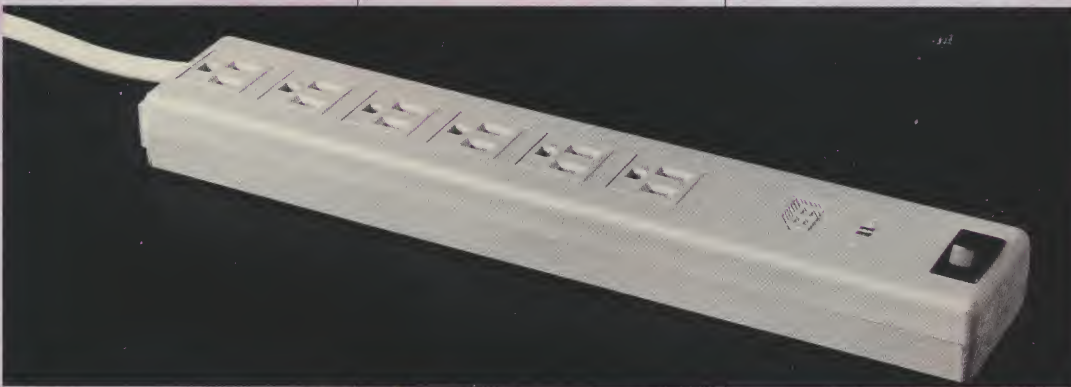

luminated master switch, and you'll have power from six 15-amp rated outlets. PowerLine provides advanced surge protection and noise filtration. And, in the unlikely event of a surge protection failure, you'll

hear an audible warning signal and see the LED light shut off. UL listed.

CL 5033
ComputerLand
PowerLine Strip
with alarm \$49.95

SURGE PROTECTORS

■ Computer equipment can be damaged by high voltage on power lines, even when it lasts for only tiny fractions of a second. Surge suppressors are an inexpensive insurance policy against power fluctuations that less delicate equipment, like refrigerators or clocks, would never notice. It's hard to find out if voltage spikes ever affect your power lines, but it doesn't cost much to keep them from damaging your system.

ADVANCED POWER PROTECTION FROM EFI.

■ Did you know that a simple act like turning off an air conditioner can damage or destroy your computer equipment? For the ultimate in protection against transient voltage spikes and surges, you won't find a better product than the Power Strip from EFI. Tested by Portland General Electric

against ten other surge suppressors, EFI was found to deliver "the highest reliability . . . and consistent performance." Includes a sturdy 6-foot cord and a master switch that controls six outlets. Comes with a 5-year manufacturer's warranty. UL listed and CSA approved.

POWER PROTECTION.

■ Computer systems are especially vulnerable to disturbances in their power supply. Too little power and you get a "brownout." Too much power, or "surge," can burn out delicate circuitry and wreck your hard disk. Fluctuating voltage can result in data loss and damage to your equipment. Small fluctuations in power, or "noise," can also result in data loss, software failure, and damage to valuable equipment. A total loss of power—or "blackout"—often causes complete loss of current data throughout your entire system. ComputerLand offers a range of power products to guard against these common power problems.

WHEN YOU CAN'T PUT A PRICE ON YOUR DATA.

■ Sooner or later, it happens to almost every computer user. Suddenly, there's an unexpected blackout or brownout.

ELIMINATE IRRITATIONS.

WHEN A SURGE SUPPRESSOR IS NOT ENOUGH.

And just as suddenly, the data you've been working on—perhaps for days or weeks—is gone. You can protect yourself against this kind of expensive catastrophe with Tripp Lite's BC series battery backups. Self-contained, heavy-duty and maintenance free, these units provide you with ample time and power to shut down your system with no loss of

■ Unlike most backup systems that switch to battery power during low voltage (brownout) conditions, Omnipower automatically adjusts low voltage to 120 VAC.

Omnipower is the first battery backup system with brownout-correcting voltage regulation. In addition to its built-in reliable battery backup during total blackouts, Omnipower features full AC

■ Brownouts are the most common of all power problems. A surge suppressor won't protect you from these low voltage conditions. The Line Stabilizer from Tripp Lite actually corrects brownouts. The LC series automatically adjusts varying input voltages to provide full voltage support at all times so you get steady, uninterrupted power. Corrects to 120 VAC with input from 87 VAC to 140 VAC. Line stabilizers also feature built-in

data. Comes in 450 watt, 750 watt, and 1,200 watt models. No installation is necessary.

BATTERY BACKUP SYSTEMS

■ You only need to experience it once—that terrible feeling of panic when you're at the computer and the lights flicker. Even a line conditioner can't help when the power goes out completely. You lose all your current data, and you could damage your hard disk. Don't let it happen to you! Investing in a battery backup system ensures that when a blackout hits, you'll have time to save your data and avoid harm to your hard disk. Ask your ComputerLand dealer about wattage requirements for your particular system.

POWER SAVER PLUS OFFERS 3-IN-1 PROTECTION

■ How much power can you pack into a compact 15" x 14½" x 2½" unit?

Plenty, when you're talking about the Power Saver Plus from Computer Accessories. This compact device slips between your computer and monitor, giving you the benefit of a 400-watt uninterruptible power supply, a line conditioner, and power control for your entire computer system.

Power Saver Plus protects personal computers and mo-

dems from power problems such as voltage dips, blackouts, surges, transient spikes, and line noise. This means more protection for your sensitive hard disks—and your valuable data. At the same time, you'll enjoy complete control over your system. Use the six front switches to power on each component one at a time, or use the master to

switch them on all at once.

Power Saver Plus includes a static discharge nameplate, modem surge protection, and five outlets. Best of all, you get all this power and protection at a very good price.

CA 5114

ES 5186
Mac Plus, Mac SE or Apple IIGS to Imagewriter. 8 foot.

ES 5059
Mac Plus, Mac SE or Apple IIGS to Imagewriter II. 8 foot.

PERFECT POWER

■ System Saver SE is the perfect power center for the Macintosh SE. It offers two outlets and a replacement for your Macintosh's power cord, all controlled by your choice of one or two front-mounted switches. Surge suppression, noise filtering and modem surge suppression protect your entire system.

For a Macintosh or Macintosh Plus, choose the System Saver Mac. It also provides two outlets with surge suppression and noise filtering, and includes a quiet fan to keep your Macintosh cool.

System Saver Mac, beige	99.95
KE 5111	
System Saver Mac, platinum	99.95

CALM, COOL AND COLLECTED.

■ System Saver® IIGS organizes the power for your Apple IIGS with four outlets and two lighted switches. One switch controls your IIGS and monitor, the other your peripherals. It protects your entire system with surge suppression and noise filter-

ing. And its quiet fan keeps your IIGS running cooler and longer.

For Apple IIe, choose the original System Saver (not shown), for cooling, surge protection, two outlets, and one switch.

PUT YOUR COPY NEXT TO YOUR SCREEN.

■ Tired of twisting your neck back and forth between the copy on your desk and your computer screen? Get yourself a Kensington copy stand. It's easy to install on any monitor (velcro fasteners provided). Fully adjustable in all direc-

tions, it also comes with a copy clip and line follower. Best of all, it saves desktop space at an outstandingly low price.

Universal Copy Stand	\$29.95

COMPUTER FORMS AND STATIONERY.

■ From ComputerLand comes a complete line of blank and imprinted forms for all of your accounting and correspondence needs. You'll find only the best quality here—and some of the best values, too.

Our blank multi-purpose forms can be used for any purpose—you create your own software-driven headings and columns. These forms have a tinted screen background, with no printed headings for ultimate versatility.

ComputerLand's statement and invoice forms provide

standard headings for your accounts receivable, and give you flexibility at a low cost.

Our bond stationery comes in three colors with matching number 9 envelopes. Rotary file cards and post cards will come in handy for a number of business uses.

ComputerLand

COMPUTER- LAND PAPER.

■ Polished, professional-looking documents require the right paper. That's why ComputerLand offers a wide selection of top-quality continuous-form paper.

ComputerLand paper looks great: bright, evenly textured, and opaque. But looks aren't everything. ComputerLand

paper also performs well. Perforations are precise and virtually invisible. They tear off cleanly and easily. Margin holes are cleanly punched, so forms feed smoothly. And we've eliminated the paper dust and chaff that can cause print head wear and ribbon damage.

Save yourself time and irritation—and protect your printer—by choosing ComputerLand form-feed paper. Competitively priced, they'll save you money as well.

WHITE BOND.

■ Our 20-lb. white bond lettered-edge paper is professional, presentation-quality paper. You'll get a smooth, clean edge on all four sides to prevent paper jamming.

SUPPLIES & MAINTENANCE

KEEP IT CLEAN.

■ Dirt, dust and debris can damage your computer. Even tiny amounts of dust, particles from cigarette smoke, and air pollution can damage sensitive computer components and media. Meticulous maintenance is the answer; it protects your system and saves you

money. These products from 3M are top-grade, cost-effective, and easy to use.

■ The Platen Cleaner & Restorer Pak instantly restores paper grip, ensures reliable paper and envelope feeding, and effectively removes ink, correcting fluids, and other damaging debris. Contains five single-use platen cleaners.

TM 4208	
Platen Cleaner	\$6.95

■ What can you do with all those old diskettes containing files you don't need anymore? Recycle them using 3M's handy diskette labels. Simply replace old labels with new ones—it's like getting a new diskette. The labels also come in handy for reorganizing diskettes you're currently using. Packaged in quantities of 200, 5 colors in a package.

TM 4244	
200 Diskette Labels	\$17.90

■ 3M's Screen Cleaner and Restorer Kit eliminates glare, dust and static buildup. The kit includes 40 single-use cleaning pads and a reusable buff cloth.

TM 4149	
Screen Cleaner	\$9.95

■ Your computer's write/read heads complete millions of revolutions each year. Keeping the heads in top condition is a must; dirty heads cause errors and steady deterioration

SAFE IN THE MAIL?

■ Mail your diskettes with complete confidence using 3M's sturdy, reliable diskette mailers. They offer excellent protection from bending, dust,

of diskettes. We offer kits for 3½" and 5¼" drives. The cleaners are quick and simple to use; the 3½" drive cleaner is good for 30 cleanings and the 5¼" cleaner is good for 10.

TM 4150	
3½" Disk Drive Cleaner	\$19.95

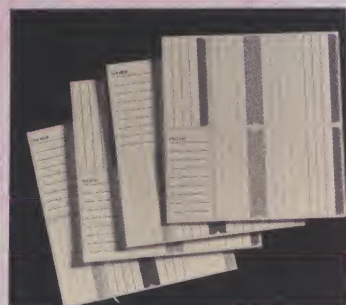

TM 4151	
5¼" Disk Drive Cleaner	9.95

■ Your tape drive data cartridges back up all your data, ensuring that if other systems fail, your data stays protected. The 3M Data Cartridge Head Cleaning Kit does a complete job—and prevents costly service calls, lost information, and loss of valuable time. Each kit includes one cleaning cartridge with pad, one ounce of cleaning solution, ten cleaning pads, one side actuator key, and one lever handle.

IBM

PRINTER RIBBONS.

■ IBM's own ribbons are specially designed for optimal performance with IBM printers. The ribbon's thickness and fabric weave, and even the type of ink used, optimize IBM printer's performance. And, because every print job is not the same, IBM offers a variety of ribbons—and supplies—for different printing needs.

ComputerLand

COMPUTERLAND PRODUCTS

■ Now, ComputerLand has its own broad line of fine products, ranging from diskettes to computer systems. Each product is selected for its consistent high quality, its reliability, its availability, and its cost-effectiveness. Our products so far include diskettes, diskette

boxes, printer stands, power-related products, including surge suppressors, cables, and power directors. In addition, ComputerLand proudly offers its own line of supplies—including form and sheet paper and envelopes.

Meanwhile, research and development is continuing, and our product line will continue to grow as a result. ComputerLand is committed to marketing its own line of microcomputers, specially designed and manufactured to our own exacting standards.

Watch our line of ComputerLand products grow; we're backed by a worldwide network of computer stores and experts—and more than a decade of experience selling personal computers to individuals and businesses.
